

SUT Coin Detail Research

SUT COIN - RESEARCH NOTE

SuperTrust (SUT)

Researched 29 Sep 2026

Not financial or legal advice. Crypto prices change by the minute, and the figures below are a snapshot from the sources listed at the end, taken on 29 Sep 2026. Allegations reported in the media are marked "REPORTED"; they are not proven.

v2 CORRECTS v1 ON THREE POINTS

1. The March 2026 BitMart delisting and the April 2026 "contract swap" were **NOT SuperTrust**. They were a different token, Sanity United, which also used the ticker SUT. CoinMarketCap's AI news page mixed the two up, and v1 repeated the error.
2. The "issuer can freeze sells / mint tokens" warning is out of date. The verified contract cannot mint and has no fees or blacklist. Its only admin power was pausing transfers, and ownership was given up (renounced) on 20 Jul 2026, so nobody can pause it now.
3. CertiK's own site scores SUT 74.06 (grade BBB), not the "3.7" that CoinMarketCap displays.

0. WHICH "SUT"?

At least three unrelated tokens have used the ticker SUT:

- **SuperTrust (SUT)** — This note. Polygon contract `0x98965474ecbec2f532f1f780ee37b0b05f77ca55`
- **Super Useless Token** — A small game token for the "MORCHI" mini-game, also on Polygon.
- **Sanity United (SUT)** — An Ethereum token that BitMart listed and delisted in 2026. It has since been swapped into a new token called SU.

Always check the contract address.

1. IN ONE PARAGRAPH

SuperTrust (SUT) is a Polygon token launched on 29 Jan 2024, issued by MUST COMPANY SG PTE. LTD. (Singapore) and run in Korea by 주식회사 슈퍼트러스트 (SUPERTRUST Co., Ltd.), with CEO Kim Hak-eung. It is marketed as a payment token for a group of platforms (ads, film, travel, nature mapping) that give discounts when you pay in SUT. The code is a simple, verified token with ownership now given up. But the market for it is extremely thin, a few wallets hold most of the supply, and Korean media have linked it to MSQUARE GLOBAL's "SuperSave" scheme: a reported criminal complaint alleging fraud and illegal fund-raising, a bank freezing its accounts, and a Korean exchange (GOPAX) delisting it. The price is about \$0.40, 97% below its September 2025 peak.

2. WHO IS BEHIND IT

Issuer (Singapore) — MUST COMPANY SG PTE. LTD.

- Company registration no. (UEN) 202313835R.
- Incorporated 11 Apr 2023, status Live.
- Registered activity: software development.

- Checked via a third-party copy of Singapore's company registry (ACRA), not ACRA directly.
- The whitepaper calls it "an overseas subsidiary in Singapore".

Operator (Korea) — 주식회사 슈퍼트러스트 (SUPERTRUST Co., Ltd.)

- Founded 12 Aug 2022.
- Business registration no. 559-87-02646.
- Address: 서울 강남구 학동로30길 34.
- The Korean exchange GOPAX names it as the entity running the token.

CEO — Kim Hak-eung (김학응), confirmed by ESG경제 (Oct 2025).

Team (project's own claims) — Ryu Jae-hyung (PM), İsmail Görkem Kara (CTO), Irfan Ali, Elma Barbudo (HR), Ri Le Tan, K M Mahmudul Hasan, Syamsul Bachri.

Other holdings

- 4.79% of Giant Chemical (a bidder for KS Industries). The same Oct 2025 article said SuperTrust has had zero revenue for three years.
- A claimed stake in the Mongolian miner Bolor Geo (30%, with a conditional deal for 80%).

Advisors

The claimed TON Network and Outlier Ventures advisors could NOT be verified anywhere, including the whitepaper and the project site. The only partner the project names is "Victus Capital", which is also unverified.

Link to MUST Company

The website of MUST Company (must.company, an IT services firm with HQ in Gangnam, Seoul and a delivery hub in Lahore) lists "MUST COMPANY SG PTE. LTD., 1 Raffles Place #20-02, Singapore" in its footer. That is the same name as SUT's issuer. must.company also shows a case study for P2U, a MSQUARE-linked platform. No page on must.company mentions SUT itself.

→ This concerns our own company. Treat it as a possible conflict of interest, and confirm internally.

3. LINK TO MSQUARE / MSQ

The evidence points to the same group, although the company now denies it.

- Nate/news (8 Jan 2025) headline: "엠스퀘어(주) 계열사 (주)슈퍼트러스트", i.e. SuperTrust is an affiliate of MSQUARE.
- 천지일보 (23 Dec 2024) reported an MSQUARE briefing that described it as issuing "MSQ, SUT" and paying returns through "SuperSave". Korea's Press Arbitration Commission later ordered a correction: MSQUARE did not promise a fixed 140% return.
- Fieldnews (14 Nov 2025): "MSQUARE GLOBAL and affiliate SuperTrust" filed a joint defamation complaint.
- The supertrust.club site code uses labels like msquare_nature_book, msquare_l2u and msquare_zeroplus.
- Nature Book pays out in P2U coins, and P2U runs on the MSQUARE MARKET app.
- Company position (8 Aug 2026): SuperTrust and MSQUARE GLOBAL are "separate businesses, operated independently" (supertrust.club notice 4615).
- Nexus (our QA agent) is currently reviewing the msquare-admin-frontend repository.

4. MARKET SNAPSHOT (29 Sep 2026)

- **Price** — ~\$0.398 (CoinMarketCap, CoinGecko and CoinCodex agree)

- **Market cap** — ~\$75.0M on CoinMarketCap (counting 188.4M in circulation). CoinGecko shows none, since it has no circulating-supply figure.
- **Fully diluted value** — ~\$94.8M-\$95.2M (CoinMarketCap: \$94.78M-\$94.99M; CoinGecko: \$94.79M-\$95.22M)
- **24h trading volume** — ~\$65K-\$75K (roughly 0.1% of market cap)
- **Rank** — CoinMarketCap #301-302. No CoinGecko rank. Other sites differ: Gate "#372"; CoinLore #1,133 (it still uses an old 2.02M supply).
- **Holders** — ~54,000-56,000, depending on the source
- **All-time high** — \$14.10-\$14.78 (6-8 Sep 2025, depending on the source)
- **All-time low** — ~\$0.113-\$0.116 (19 May 2026)
- **Change** — -97.3% from the peak; -90.4% over one year (CoinMarketCap); +~54% over 30 days
- **Supply figures differ by source:**
 - CoinMarketCap: 188.4M circulating
 - the project's own report to CoinMarketCap: 46.6M
 - CoinLore (outdated): 2.02M

5. IS IT REALLY "TOP 500"?

Only because of how its supply is counted, not because of price.

- **Nov 2024 - May 2025** — ranked #2,945 - #3,579
- **Jul - Aug 2025** — #873 - #989
- **6 Sep 2025 (peak)** — #774 (CoinMarketCap counted only 2.02M in circulation then)
- **1 Jan 2026** — #2,049
- **9 Feb 2026** — #2,049 (2.02M counted)
- **10 Feb 2026** — #299 (188.4M counted from this day, at the same ~\$0.60 price)
- **20 Mar 2026** — #285 (best rank since then)
- **19 May 2026 (low)** — #683
- **Sep 2026** — #301 - #385, depending on the CoinMarketCap page (the live and historical pages disagree)

By trading activity it is far lower. Of about 35 coins ranked #285-#319, only one trades less relative to its size. Similar-sized coins (SushiSwap, Kava, Zilliqa, Baby Doge) trade 10-200 times more each day.

6. TOKEN AND CONTRACT (on-chain, verified)

Contract — `0x98965474ecbec2f532f1f780ee37b0b05f77ca55` (Polygon)

- Deployed 29 Jan 2024.
- Source code verified (Blockscout full match; Sourcify exact match).

Code — A standard OpenZeppelin ERC-20 token with pause and single-owner functions.

- All 238,403,732 SUT were created once, at deployment.
- No minting afterwards, no blacklist, no fees or tax.
- Not a proxy (its code can't be swapped out).
- The only admin power was pause/unpause.

Ownership — Handed over:

- 27 Aug 2025
- 25 Sep 2025
- 21 Jun 2026

Given up (renounced) on 20 Jul 2026 (tx `0xf52d0924...acc7d`).

Owner is now `0x000...000` and the token is not paused, so nobody can pause it any more.

- CertiK's page still shows an older owner address.

"Burn" — 50,000,000 SUT were sent to the dead address (`0x...dEaD`) on 19 Mar 2024.

- Nobody can spend them, but they were not destroyed: the official total supply still reads 238,403,732.

Supply path — All tokens went from the creator to wallet `0xc4e930...3ece` on 30 Jan 2024, and were distributed from there. It looks like a team/treasury wallet (inference; unlabelled), and its balance is now 0.

Security

- GoPlus live check: no honeypot, not mintable, not a proxy, no blacklist, no hidden owner, no fees.
- CertiK Skynet: 74.06 (BBB). Code 62.9, Fundamentals 49.08, Governance 98, Market 91.72.
- CertiK also lists: not audited by CertiK, no third-party audit, no team identity check (KYC), no bug bounty, and holder concentration "High".
- CoinMarketCap shows the CertiK score as 3.7 (not reconciled).

7. WHO HOLDS IT

Top 10 wallets hold ~71% of all supply (~50% not counting the dead address). CertiK puts the "major holding ratio" at 54.25%.

- **#1** `0xbc0e5c...6144` — 50,000,000 — 20.97%
 - Unlabelled. Received 49,999,999 on 21 Oct 2025.
- **#2** `0x...dEaD` — 50,000,000 — 20.97% (the "burn" address)
- **#3** `0xd6eac4...7e81` — 18.0M — 7.55%
- **#4** `0xaaa4d5...cc2c` — 13.1M — 5.51%
- **#5** `0xf46e16...7bc8` — 10.3M — 4.31%
- **#6** `0x29da84...f841` — 10.0M — 4.19%
- **#7** `0x8b2fdf...bb72` — 10.0M — 4.19%
- **#8-#10** — hold 1-1.5% each.
- None of the top holders are exchanges or liquidity pools, and none has a public label.
- The 50M in wallet #1 may be the 50M lock-up (until 2045) that SuperTrust announced on 24 Aug 2025. That is unconfirmed.
- GOPAX's Dec 2024 review said the foundation held 90M SUT (47.8%). That contradicts the project's "zero reserve / 100% private sale" claim.

8. TIMELINE

- **12 Aug 2022** — SUPERTRUST Co., Ltd. founded in Korea.
- **11 Apr 2023** — MUST COMPANY SG PTE. LTD. incorporated in Singapore.
- **29 Jan 2024** — SUT contract deployed on Polygon; no public sale (the project calls it "100% private sale").

- **19 Mar 2024** — 50M SUT sent to the dead address.
 - **8 Nov 2024** — First exchange listing: BingX.
 - **18 Nov 2024** — Added to CoinMarketCap (~\$2.27).
 - **12 Dec 2024** — Listed on GOPAX (Korean won market).
 - **8 Jan 2025** — Listed on MEXC.
 - **1 Jan-13 Feb 2025** — ~90,000 transactions worth ~KRW 200B through SuperTrust's bank accounts.
 - **4 Apr 2025** — Listed on Gate.
 - **14 Apr 2025** — Shinhan Bank froze SuperTrust's deposits, treating it as an unregistered virtual-asset business.
 - **30 Apr 2025** — A Seoul court rejected SuperTrust's request to lift the freeze; the company appealed.
 - **Aug 2025** — GOPAX announced it would stop supporting SUT (SuperTrust notice, 21 Aug 2025). Per search snippets, the reason was "possible legal violations and failure to disclose material matters". SuperTrust sought an injunction.
 - **24 Aug 2025** — SuperTrust announced a 50M SUT lock-up until 2045.
 - **6-8 Sep 2025** — All-time high (\$14.10-\$14.78).
 - **Sep 2025** — Price -75% in about three weeks (no cause found).
 - **11 Sep 2025** — SUT buyback offer at KRW 18,000, totalling KRW 10B.
 - **12 Nov 2025** — Police sent a defamation case against the operator of an "MSQUARE victims' chat room" to prosecutors. MSQUARE and SuperTrust had brought the case.
 - **19 Nov 2025** — Listed on KuCoin.
 - **Late Nov-Dec 2025** — Price fell to ~\$0.44. Reported daily volume was \$47M-\$73M against a ~\$3M market cap, which is highly unusual.
 - **16 Jan 2026** — "1,000 SUT → 2,000 USDT" buyback offer, conditional on joining SuperSave.
 - **10 Feb 2026** — CoinMarketCap started counting 188.4M in circulation; rank jumped from #2,049 to #299.
 - **18-19 May 2026** — Price -80% in two days; all-time low ~\$0.113-\$0.116. No cause found.
 - **20 Jul 2026** — Contract ownership renounced.
 - **8 Aug 2026** — SuperTrust statement: independent from MSQUARE GLOBAL.
 - **Late Aug-Sep 2026** — Rally to ~\$0.80, then back to ~\$0.40.
-

9. WHERE IT TRADES (29 Sep 2026)

- **Gate** — SUT/USDT — ~\$42.6K / 24h (~58% of volume)
 - **Uniswap V3** — Polygon, SUT/USDT0 pool — ~\$22K / 24h, ~\$91K of liquidity
 - **BingX** — ~\$5.3K / 24h
 - **KuCoin** — ~\$3.7K / 24h
 - **Other:** CoinUp.io (~\$47K reported, but excluded by CoinMarketCap), De¹, Uniswap V4 (tiny), plus about 20 Uniswap V4 / QuickSwap pools of up to ~\$7.4K each with no trading.
 - **Order book depth on Gate within ±2% of the price:** only +\$4.4K / -\$12.0K.
 - No longer trading: MEXC (the API says "invalid symbol"; no delisting notice found) and GOPAX (delisted 2025).
 - LBank lists a SUT market at ~\$0.028 with \$722 volume, likely an old or different token. Not a valid market.
 - The Uniswap liquidity is not locked. About 97% of it is held by 4 wallets, who can withdraw it at any time.
-

10. THE PLATFORMS - WHAT ACTUALLY EXISTS

- **SuperTrust app** — Live. Google Play: 10K+ downloads, 4.9 stars (2.63K reviews). Launched Jan 2026.
 - **ZERO PLUS (film)** — Site is live, run by SUPERTRUST Co. The app has only 50+ downloads.
 - **MOAD (ads)** — Site moad.live is live. A beta was announced for Apr 2025, but its app listing could not be found.
 - **L2U (travel)** — Live at l2u.co.kr, but run by a separate company (레저투유, CEO 박성진). The SUT discounts were announced on 26 Jan 2026.
 - **NATURUBOOK** — naturebook.club, "Naturebook Lab Co., Ltd." (© 2021). Who owns it relative to SuperTrust is unclear.
 - **AI Studio 48** — Only a press release (Jun 2025). No product found.
 - **SUT GOLD Connect** — Only in the whitepaper. Unverified.
 - **Usage claims** — 40,000+ community members and 2,000+ stores accepting SUT (company claims, unverified).
-

11. RISKS AND PROBLEMS

11a. Legal and reputational (most serious)

1. REPORTED criminal complaint.

A reporter filed a fraud and illegal fund-raising (유사수신) complaint with the Seoul police against MSQUARE GLOBAL and affiliates including SuperTrust. Allegations:

- 30,000+ investors recruited through the unlicensed "SuperSave" platform;
- a pitch of "10M KRW → 24M KRW in a year" using SUT;
- a reported investor death, which SuperTrust calls false.

The outcome is unknown. Source: smartfn, seen via search snippet only.

2. Bank account freeze (verified).

Shinhan Bank froze SuperTrust's deposits in Apr 2025, treating it as an unregistered virtual-asset business. A court upheld the freeze; the company appealed.

3. GOPAX delisting (Aug-Sep 2025).

The exchange cited possible legal violations and non-disclosure, per search snippets.

4. REPORTED Ponzi concerns.

A lawyer's public post calls the scheme a "typical Ponzi suspicion" (opinion). SuperTrust's own notices show buyback and "credit" offers tied to joining SuperSave, and a stated plan for a "short-term SUT value surge".

5. Legal action against critics.

SuperTrust and MSQUARE sued the operator of a victims' chat room for defamation (sent to prosecutors) and filed a ~KRW 2B damages claim.

6. A conflict of interest for us.

The issuer's name and Singapore address appear on MUST Company's website, and Nexus is reviewing MSQUARE code.

11b. Market

7. Very little trading: ~\$70K a day against a ~\$75M valuation.

Order books are ~\$4K-\$12K deep, so prices are easy to move and exiting a position may be hard.

8. The top-500 rank comes from a supply reclassification in Feb 2026.

It is not based on trading or adoption.

9. Three unexplained crashes (-75%, then to ~\$0.44, then -80%), and a -97% fall from the peak.

10. Suspicious volume: \$47M-\$73M a day in late 2025 against a ~\$3M market cap.

11. Exchanges lost: GOPAX delisted it and MEXC no longer trades it.

Most volume now comes from one exchange (Gate).

11c. Token and on-chain

12. Concentrated holdings: the top 10 wallets hold ~71% (~50% excluding the dead address).

One unlabelled wallet holds 21%.

13. The liquidity pool is unlocked and 4 wallets control it.

14. Supply figures conflict (188.4M, 46.6M or 2.02M "circulating"), and GOPAX's 47.8% foundation holding contradicts the "zero reserve" claim.

15. The 50M "burn" is a transfer to a dead address, not a reduction in total supply.

16. No security audit, no team identity check (KYC), and no bug bounty.

(Improvement: ownership has been renounced, so the old pause risk is gone.)

11d. Project and utility

17. Most platforms are unproven: 50+ downloads for ZERO PLUS, no product found for AI Studio 48 or SUT GOLD Connect, and L2U and NATURUBOOK run by other companies.

18. The 30-50% fee discount, SUT's main selling point, applies only to South Korean users of the operator's own platforms.

19. The advisors the project claims (TON Network, Outlier Ventures) can't be verified.

20. Information is unreliable: CoinMarketCap's AI summaries mixed SUT up with another token, and data sites disagree on price records, supply and rank.

12. RESEARCH LIMITS

- polygonscan.com, cryptorank.io, supertrust.club (partly) and some Korean news sites blocked automated access. The research used Blockscout, a public Polygon node, Sourcify, the site's WordPress data interface and GoPlus's data feed instead.
 - Items marked "search snippet" were seen only in search results, not in the full article.
 - No cause was found for any of the three crashes.
 - The outcome of the criminal complaint is unknown.
 - The MAS (Singapore) investor alert list was not checked directly. No Singapore (MAS) or Korean regulator (FSC) warning naming SUT was found.
-
